

**ONE
COMPANY,
UNLIMITED
SOLUTIONS**

Flodraulic Europe

A European System Integrator that offers solutions and support to clients who seek a dedicated partner and embrace a collaborative approach. Each project is carefully tailored, utilizing the best components available on the market, meticulously selected to meet specific needs and requirements.

DRIVES
COMPETENCE
CENTER

R&D HUB supporting Flodraulic companies to develop Hybrid and Full Electric solutions.

Mobile

Motion Systems

System integrator for mobile applications specialized in electronic and hydraulic systems, hybrid and full electric machines. Danfoss Elite Partner and Authorized Service Center.

Mobile Manifolds

In-house design and manufacturing manifolds for mobile applications, providing customized, high-performance solutions.

Design and manufacturing of hydraulic components: control valves, diverter valves, joysticks and foot pedals for the most demanding mobile applications.

Industrial

Industrial

Engineering and development of integrated hydraulic systems for the most demanding industrial applications: design and construction of hydraulic power units, manifolds and test benches.

Design and manufacturing of hydraulic systems, lubrication and automation projects for a wide variety of industrial applications. Specialized also in cooling systems and water valve benches.

Specialized in the manufacturing of hydraulic mechanical components, with particular expertise in the design and production of medium to large-size manifolds.

Fluid Conveyance

Fluid Conveyance

Bended pipes and flexible hoses for industrial and mobile applications, with 3D modeling expertise. Fittings and adaptors for hydraulics and pneumatics. Hydraulic components and filtration.

Flodraulic: a worldwide footprint
