

# MOBILE MANIFOLDS

The philosophy of  $\pi$

Mobile Manifolds

# Flodraulic

## Mobile Manifolds

Flodraulic Mobile Manifolds Division specializes in the in-house design and manufacturing of manifolds for mobile applications, delivering customized, high-performance solutions.

With a global presence in the USA, Canada and Europe, and strategically located manufacturing in China, we are able to offer the **perfect balance of innovation, quality and cost-effectiveness.**

# In-house Machining

Our in-house manufacturing enables us to produce **optimized manifolds** while meeting customer deadlines, streamlining the supply chain by **eliminating intermediary steps**.

# Application Expertise

Each manifold is **custom-designed**, leveraging deep application expertise and the ability to quickly identify the **most effective technology mix**. With access to a wide range of cartridge valve brands, electronic on board and directional valve, we develop the best solution to achieve the **ideal balance of size, efficiency, and performance**.

# Reduced time to market

Our  $\pi$  approach means:

**3,**  
working days
